

INTRODUCING THE NEW **TAURUS 25L** Mobile Deionising Water Station

Internech Systems is proud to introduce the Taurus 25L Deionising Water Station. The Taurus 25L offers an extremely convenient and cost effective water solution. With a large capacity that can be filled directly from any tap, and two built-in DI filters, it can be moved quickly to any application that requires water of high purity.

BENEFITS

- Convert tap water into almost ultra-pure water (above 17 Mega Ohms)
- Comes with industry standard monitor to give accurate purity levels at point of usage
- Buzzer/Red Light to alert user at adjustable set point

- A highly mobile system consisting an autofill tank, two special DI filters and a Myron inline monitor to give the most precise purity reading
- Suitable for Clean Rooms, Semiconductor Foundries, Laboratories and Electronic Industries – laser machines, chillers and frequency drives etc.
- Optimises your equipment life - your investment is protected because users get the most accurate water parameters
- Station comes with a 25 litre tank, a 12V/18AH SLA Maintenance-free Power Storage Battery, a DC12V / 5A / 2.0L-4.0L/min Pump, Stainless Steel Trolley and ESD Wheels.
- Usage time can go up to more than 5 hours (cummulative time).
